B.A.D. ETF - FUND SUMMARY

Investment Objective

The B.A.D. ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, correspond generally to the EQM BAD Index (the “Index”).

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (<i>fees paid directly from your investment</i>)	None
Annual Fund Operating Expenses (<i>expenses that you pay each year as a percentage of the value of your investment</i>)	
Management Fee	0.75%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.75%

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year: \$77 3 Years: \$240 5 Years: \$417 10 Years: \$930

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. For the fiscal period December 22, 2021 (commencement of operations) through November 30, 2022, the Fund’s portfolio turnover rate was 23% of the average value of its portfolio.

Principal Investment Strategies

The Fund uses a “passive management” (or indexing) approach to seek to track the performance, before fees and expenses, of the Index. The Index is owned by Thematic Investments, LLC (dba “The BAD Investment Company”) (the “Adviser”) and administered by EQM Indexes LLC (the “Index Provider”).

EQM BAD Index

The Index is a rules-based index that seeks to provide exposure to a portfolio of (i) betting or gambling companies, (ii) alcohol companies, (iii) Canadian cannabis companies (defined by the Fund as cannabis companies listed on a Canadian exchange, domiciled in Canada, and/or located and primarily operating in Canada), and/or (iv) pharmaceutical companies.

Construction of the Index begins with a universe of securities of U.S. exchange-listed companies or American Depositary Receipts (“ADRs”) or Global Depositary Receipts (“GDRs”) of issuers in foreign markets, including emerging market countries. Emerging market countries are those countries with low- to middle-income economies as classified by the World Bank, or included in any of the Morgan Stanley Capital International (MSCI) emerging markets indices. To qualify for inclusion in the Index, companies must have a minimum six-month average daily traded volume of \$1 million.

The companies in the investment universe are then screened to identify those that meet at least one of the criteria below (each, a “Business Category”). The resulting companies comprise the Index.

- i. Companies that derive a majority of their operating revenue from casinos, gaming and online gaming operations and have a market capitalization of at least \$1 billion;
- ii. Companies that derive a majority of their operating revenue from the manufacturing and distribution of alcohol and/or cannabis cultivation and have a market capitalization of at least \$1 billion;

- iii. Companies that derive a majority of their operating revenue from pharmaceutical drug and biotechnology product development and manufacturing and have a market capitalization of at least \$10 billion. In addition, biotechnology components are limited to the top 10 companies by market capitalization.

The Index Provider utilizes issuer financial statements and other public filings and reports, as well as third-party industry research, reports, and analyses, to identify companies that meet the Index's criteria for inclusion in one of the Business Categories above.

The composition of the Index and the constituent weights are determined three business days before the second Thursday of September, December, March and June and component changes are made after the market close on the second Thursday of September, December, March and June and become effective at the market opening on the next trading day. At the time of each reconstitution, each Business Category is equally weighted at 33 1/3%. Within each Business Category the companies are equally weighted, provided, however, that the Fund's aggregate exposure to cannabis companies will not exceed 10% of the Fund's assets.

The Index is administered by the Index Provider, and the Index is calculated and maintained by Solactive AG. The Index Provider is independent of Solactive AG, the Fund, the Adviser, and Toroso Investments, LLC (the "Sub-Adviser"), the Fund's investment sub-adviser.

The Index will consist of approximately 50 to 65 components.

The Fund's Investment Strategy

The Fund generally will use a "replication" strategy to achieve its investment objective, meaning it will invest in all of the component securities of the Index in approximately the same proportions as in the Index. However, the Fund may use a "representative sampling" strategy, meaning it may invest in a sample of the securities in the Index whose risk, return, and other characteristics closely resemble the risk, return, and other characteristics of the Index as a whole, when the Sub-Adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

The Fund also may invest in securities or other investments not included in the Index, but which the Sub-Adviser believes will help the Fund track the Index. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions).

To the extent the Index concentrates (i.e., holds more than 25% of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index. As of December 1, 2022, the Index was concentrated in the Casinos & Gaming Industry and Pharmaceuticals, Biotechnology & Life Sciences Industry Group.

The Fund is classified as a "non-diversified" investment company under the Investment Company Act of 1940, as amended (the "1940 Act").

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's net asset value ("NAV"), trading price, yield, total return and/or ability to meet its investment objective. The following risks could affect the value of your investment in the Fund:

- **Associated Risks of Alcohol Companies.** Companies in the alcohol industry are very competitive and subject to a number of risks. Demographic and product trends, changing consumer preferences, nutritional and health-related concerns, competitive pricing, marketing campaigns, environmental factors, adverse changes in general economic conditions, government regulation, consumer boycotts, risks of product tampering, product liability claims, and the availability and expense of liability insurance can affect the demand for, and success of, such companies' products in the marketplace. Such companies also face risks associated with changing market prices as a result of, among other things, changes in government support and trading policies and agricultural conditions influencing the growth and harvest seasons. Alcohol companies may be adversely affected by the adoption of proposed legislation and/or by litigation.
- **Associated Risks of Betting and Gaming Companies.** Companies in the betting and gaming industry include those engaged in casino operations, racetrack operations, sports and horse race betting operations, online gaming operations and/or the provision of related equipment and technologies. The betting and gaming industry is characterized by an increasingly high degree of competition among a large number of participants including from participants performing illegal activities or unregulated companies. Expansion of betting in other jurisdictions (both regulated and unregulated) could increase competition with existing betting and gaming companies, which could have an adverse impact on their financial condition, operations and cash flows. In a broader sense, betting and gaming companies face competition from all manner of leisure and entertainment activities, including shopping, athletic events, television and movies, concerts and travel. In addition, established jurisdictions could award additional licenses or permit the expansion or relocation of existing betting and gaming companies. These companies also may be subject to increasing regulatory constraints, particularly with respect to cybersecurity and privacy. In addition to the costs of complying

with such constraints, the unintended disclosure of confidential information, whether because of an error or a cybersecurity event, could adversely affect the reputation, profitability and value of these companies. Finally, the betting and gaming industry is characterized by the use of various forms of intellectual property, which are dependent upon patented technologies, trademarked brands and proprietary information. Companies operating in the betting and gaming industry are subject to the risk of significant litigation regarding intellectual property rights, which may adversely affect and financially harm companies in which the Fund may invest.

- **Associated Risks of Pharmaceutical Drug Companies.** The pharmaceutical industry can be significantly affected by government approval of products and services, government regulation and reimbursement rates, pricing pressure (including price discounting), limited product lines, patent expirations, and intense competition. The costs associated with developing new drugs can be significant, and the results are unpredictable. Newly developed drugs may be susceptible to product obsolescence due to intense competition from new products and less costly generic products. Pharmaceutical companies, may be heavily dependent on clinical trials with uncertain outcomes and decisions made by the governments and regulatory authorities. Pharmaceutical companies are heavily dependent on patent protection. The expiration of patents may adversely affect the profitability of the companies. Pharmaceutical companies are also subject to extensive litigation based on product liability and other similar claims. A pharmaceutical company's valuation can often be based largely on the potential or actual performance of a limited number of products and can accordingly be greatly affected if one of its products proves, among other things, unsafe, ineffective or unprofitable. Pharmaceutical companies are subject to regulation by, and the restrictions of, the Food and Drug Administration ("FDA"), the U.S. Environmental Protection Agency ("EPA"), state and local governments, and foreign regulatory authorities.
- **Cannabis Company Risk.**
 - *United States Regulatory Risks of the Cannabis Industry.* The possession and use of marijuana, even for medical purposes, is illegal under federal and certain states' laws, which may negatively impact the value of the Fund's investments. Use of marijuana is regulated by both the federal government and state governments, and state and federal laws regarding marijuana often conflict. Even in those states in which the use of marijuana has been legalized, its possession and use remains a violation of federal law. Federal law criminalizing the use of marijuana pre-empts state laws that legalize its use for medicinal and recreational purposes. Actions by federal agencies, such as increased enforcement of current federal marijuana laws and the prosecution of nonviolent federal drug crimes by the U.S. Department of Justice ("DOJ"), could produce a chilling effect on the industry's growth and discourage banks from expanding their services to cannabis companies where such services are currently limited. Any of these outcomes would negatively affect the profitability and value of the Fund's investments and even its ability to pursue its stated investment objective. The conflict between the regulation of marijuana under federal and state law creates volatility and risk for all cannabis companies.

Because marijuana is a Schedule I controlled substance under the Controlled Substances Act ("CSA"), meaning that it has a high potential for abuse, has no currently "accepted medical use" in the United States, lacks accepted safety for use under medical supervision, and may not be prescribed, marketed or sold in the United States, few drug products containing cannabis or cannabis extracts have been approved for use by the FDA or obtained registrations for commercial production from the U.S. Drug Enforcement Agency ("DEA"), and there is no guarantee that such products will ever be legally produced or sold in the U.S. Cannabis companies in the U.S. that engage in research, manufacturing, distributing, importing or exporting, or dispensing controlled substances must be registered (licensed) to perform these activities and have the security, control, recordkeeping, reporting and inventory mechanisms required by the DEA to prevent drug loss and diversion. Failure to obtain the necessary registrations or comply with necessary regulatory requirements may significantly impair the ability of certain companies in which the Fund invests to pursue medical marijuana research or to otherwise cultivate, possess or distribute marijuana. In addition, because cannabis is a Schedule I controlled substance, Section 280E of the Internal Revenue Code of 1986, as amended (the "Code") applies by its terms to the purchase and sale of medical-use cannabis products and provides that no deduction or credit is allowed for expenses incurred during a taxable year "in carrying on any trade or business if such trade or business (or the activities which comprise such trade or business) consists of trafficking in controlled substances (within the meaning of Schedules I and II of the CSA) which is prohibited by federal law or the law of any state in which such trade or business is conducted." The disallowance of such tax deductions will likely affect the value of cannabis companies.

- *Non-U.S. Regulatory Risks of the Cannabis Industry.* Laws and regulations related to the possession, use (medical and recreational), sale, transport and cultivation of marijuana vary throughout the world, and the Fund will only invest in Canadian cannabis companies if such companies are operating legally in the relevant jurisdiction. Even if a company's operations are permitted under current law, they may not be permitted in the future, in which case such company may not be in a position to carry on its operations in its current locations. Additionally, controlled substance legislation differs between countries and legislation in certain countries may restrict or limit the ability of certain companies in which the Fund invests to sell their products.
- *Operational Risks of the Cannabis Industry.* Companies involved in the cannabis industry face intense competition, may have limited access to the services of banks, may have substantial burdens on company resources due to litigation,

complaints or enforcement actions, and are heavily dependent on receiving necessary permits and authorizations to engage in medical cannabis research or to otherwise cultivate, possess or distribute cannabis. Because the cultivation, possession, and distribution of cannabis is in all circumstances illegal under United States federal law, federally regulated banking institutions may be unwilling to make financial services available to growers and sellers of cannabis.

- **Concentration Risk.** Because the Fund’s assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries. As of December 1, 2022, the Index was concentrated in the Casinos & Gaming Industry and Pharmaceuticals, Biotechnology & Life Sciences Industry Group.
 - *Casinos & Gaming Industry.* The Casinos & Gaming Industry includes owners and operators of casinos and gaming facilities, and companies providing lottery and betting services. The Casinos & Gaming Industry is highly competitive and companies operating in the Casinos & Gaming Industry rely heavily on consumer spending and the availability of disposable income for success. In addition, the Casinos & Gaming Industry may be negatively affected by changes in economic conditions, consumer tastes and discretionary income levels, technological developments, limited financial resources, competition from competing entertainment options, and competition for key personnel. Casinos are closely tied to the travel and tourism industry and are particularly sensitive to economic shutdowns and mitigation strategies, such as the COVID-19 pandemic. In addition, Casinos & Gaming Industry companies are highly regulated, and state and federal legislative or regulatory changes and licensing issues (as well as the laws of other countries) can significantly impact their ability to operate in certain jurisdictions. The Casinos & Gaming Industry is a sub-industry of the Hotels, Restaurants & Leisure Industry within the Consumer Discretionary Sector.
 - *Pharmaceuticals, Biotechnology & Life Sciences Industry Group.* The Pharmaceuticals, Biotechnology & Life Sciences Industry Group includes companies operating in the Biotechnology, Pharmaceuticals and Life Sciences Tools & Services Industries. Companies in the Biotechnology Industry are primarily engaged in the research, development, manufacturing and/or marketing of products based on genetic analysis and genetic engineering, including companies specializing in protein-based therapeutics to treat human diseases. Companies in the Pharmaceuticals Industry include companies engaged in the research, development or production of pharmaceuticals, including veterinary drugs. Companies in the Life Sciences Tools & Services Industry include companies enabling the drug discovery, development and production continuum by providing analytical tools, instruments, consumables & supplies, clinical trial services and contract research services and include firms primarily servicing the Pharmaceuticals and Biotechnology Industries. Companies operating within the Pharmaceuticals, Biotechnology & Life Sciences Industry Group may be significantly affected by, among other things, government approval of products and services, government regulation and reimbursement rates, product liability claims, patent expirations and protection, and intense competition. The prices of securities of such companies also may be affected by world events and market, economic and political risks of countries where the companies are located or do business. Legislative or regulatory changes and increased government supervision also may affect companies in the Pharmaceuticals, Biotechnology & Life Sciences Industry Group.
- **Depository Receipt Risk.** Depository receipts, including ADRs, involve risks similar to those associated with investments in foreign securities, such as changes in political or economic conditions of other countries and changes in the exchange rates of foreign currencies. Depository receipts listed on U.S. exchanges are issued by banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares (“Underlying Shares”). When the Fund invests in depository receipts as a substitute for an investment directly in the Underlying Shares, the Fund is exposed to the risk that the depository receipts may not provide a return that corresponds precisely with that of the Underlying Shares. Because the Underlying Shares trade on foreign exchanges that may be closed when the Fund’s primary listing exchange is open, the Fund may experience premiums and discounts greater than those of funds without exposure to such Underlying Shares.
- **Emerging Markets Risk.** Emerging markets are subject to greater market volatility, lower trading volume, political and economic instability, uncertainty regarding the existence of trading markets and more governmental limitations on foreign investment than more developed markets. In addition, securities in emerging markets may be subject to greater price fluctuations than securities in more developed markets. Differences in regulatory, accounting, auditing, and financial reporting and recordkeeping standards could impede the Sub-Adviser’s ability to evaluate local companies and impact the Fund’s performance.
- **Equity Investing Risk.** The values of equity securities could decline generally or could underperform other investments due to factors affecting a specific issuer, market or securities markets generally.
- **ETF Risks.** The Fund is an ETF, as a result of this structure, is exposed directly or indirectly to the following risks:
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. Shares may trade at a material discount to NAV and possibly face delisting if either:
 - (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step

forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

- *Costs of Buying or Selling Shares Risk.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV Risk.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums or discounts greater than those of domestic ETFs.
- *Trading Risk.* Although Shares are listed for trading on the NYSE Arca, Inc. (the "Exchange") and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than the Shares.
- **Foreign Markets Risk.** Investments in ADRs and GDRs and ETFs that provide exposure to non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, the value of non-U.S. securities may be subject to risk of decline due to foreign currency fluctuations or to political or economic instability. Investments in ADRs and GDRs also may be subject to withholding or other taxes and may be indirectly subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.
 - *Canada Risk.* The Canadian economy is susceptible to adverse changes in certain commodities markets, including those related to the agricultural and mining industries. It is also heavily dependent on trading with key partners. Any reduction in this trading may adversely affect the Canadian economy.
- **Index Provider Risk.** There is no assurance that the Index Provider, or any agents that act on its behalf, will compile the Index accurately, or that the Index will be determined, constructed, reconstituted, rebalanced, composed, calculated or disseminated accurately. The Sub-Adviser relies upon the Index Provider and its agents to compile, determine, construct, reconstitute, rebalance, compose, calculate (or arrange for an agent to calculate), and disseminate the Index accurately. Any losses or costs associated with errors made by the Index Provider or its agents generally will be borne by the Fund and its shareholders.
- **Market Capitalization Risk.**
 - *Large-Capitalization Investing Risk.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and, therefore, subject to slower growth during times of economic expansion. Large-capitalization companies also may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
 - *Mid-Capitalization Investing Risk.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.
 - *Small-Capitalization Investing Risk.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.
- **Market Risk.** The trading prices of securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund's NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. U.S. and international markets have experienced significant periods of volatility in recent years due to a number of these factors, including the impact of the COVID-19 pandemic and related public health issues, growth concerns in the U.S. and overseas, uncertainties regarding interest rates, trade tensions and the threat of tariffs imposed by the U.S. and other countries. In addition, local, regional or global events such as war, including Russia's invasion of Ukraine, acts of terrorism, spread of infectious diseases or other public health issues, recessions, rising inflation, or other events could have a significant negative

impact on the Fund and its investments. These developments as well as other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets. It is unknown how long circumstances related to the COVID-19 pandemic will persist, whether they will reoccur in the future, whether efforts to support the economy and financial markets will be successful, and what additional implications may follow from the pandemic. The impact of these events and other epidemics or pandemics in the future could adversely affect Fund performance.

- **Non-Diversification Risk.** Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a lesser number of issuers than if it was a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a lesser number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund’s performance.
- **Passive Investment Risk.** The Fund is not actively managed and its Sub-Adviser would not sell an investment designed to provide exposure to the Index or a constituent holding of the Index due to current or projected underperformance of a security industry or sector unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a rebalancing of the Index as addressed in the Index methodology.
- **Sector Risk.** The Fund’s investing approach may result in an emphasis on certain sectors or sub-sectors of the market at any given time. To the extent the Fund invests more heavily in one sector or sub-sector of the market, it thereby presents a more concentrated risk and its performance will be especially sensitive to developments that significantly affect those sectors or sub-sectors. In addition, the value of Shares may change at different rates compared to the value of shares of a fund with investments in a more diversified mix of sectors and industries. An individual sector or sub-sector of the market may have above-average performance during particular periods, but may also move up and down more than the broader market. The several industries that constitute a sector may all react in the same way to economic, political or regulatory events. The Fund’s performance could also be affected if the sectors or sub-sectors do not perform as expected. Alternatively, the lack of exposure to one or more sectors or sub-sectors may adversely affect performance.
 - *Consumer Discretionary Sector Risk.* Consumer discretionary companies are companies that provide non-essential goods and services, such as retailers, media companies and consumer services. These companies manufacture products and provide discretionary services directly to the consumer, and the success of these companies is tied closely to the performance of the overall domestic and international economy, interest rates, competition and consumer confidence. Success depends heavily on disposable household income and consumer spending. Changes in demographics and consumer tastes can also affect the demand for, and success of, consumer discretionary products in the marketplace.
 - *Consumer Staples Sector Risk.* Companies in the consumer staples sector, including those in the food and beverage industries, may be affected by general economic conditions, commodity production and pricing, consumer confidence and spending, consumer preferences, interest rates, product cycles, marketing campaigns, competition, and government regulations.
 - *Health Care Sector Risk.* Companies in the health care sector are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines, an increased emphasis on the delivery of healthcare through outpatient services, loss or impairment of intellectual property rights and litigation regarding product or service liability.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

Performance

The following performance information indicates some of the risks of investing in the Fund. The bar chart shows the Fund’s performance for the most recent calendar year ended December 31. The table illustrates how the Fund’s average annual returns for the 1-year and since inception periods compare with those of a broad measure of market performance. The table also shows how the Fund’s performance compares to the Index. The Fund’s past performance, before and after taxes, does not necessarily indicate how it will perform in the future. Updated performance information is available on the Fund’s website at <https://badinvestmentco.com>.

Calendar Year Return as of December 31

During the period shown in the bar chart, the best performance for a quarter was 12.14% (for the quarter ended December 31, 2022) and the worst performance was -17.10% (for the quarter ended June 30, 2022).

Average Annual Total Returns (for the Periods Ended December 31, 2022)

	1-Year	Since Inception (12/21/21)
Return Before Taxes	-16.85%	-16.12%
Return After Taxes on Distributions	-16.98%	-16.25%
Return After Taxes on Distributions and Sale of Fund Shares	-9.88%	-12.27%
S&P 500® Index (reflects no deductions for fees, expenses, or taxes)	-18.11%	-15.63%
EQM BAD Index (reflects no deductions for fees, expenses, or taxes)	-16.23%	-15.51%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates during the period covered by the table above and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Shares through tax-deferred arrangements such as an individual retirement account ("IRA") or other tax-advantaged accounts. In certain cases, the figure representing "Return After Taxes on Distributions and Sale of Shares" may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.

Portfolio Management

Adviser Thematic Investments, LLC
Sub-Adviser Toroso Investments, LLC
Portfolio Managers Charles Ragauss, CFA® and Qiao Duan, CFA® have been the portfolio managers of the Fund since its inception in December 2021.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities and/or a designated amount of U.S. cash.

Shares are listed on the Exchange, and individual Shares may only be bought and sold in the secondary market through a broker or dealer at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the "bid" price) and the lowest price a seller is willing to accept for Shares (the "ask" price) when buying or selling Shares in the secondary market. The difference in the bid and ask prices is referred to as the "bid-ask spread."

Recent information regarding the Fund's NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund's website at <https://badinvestmentco.com>.

Tax Information

The Fund's distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account ("IRA") or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund's investment objective has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon written notice to shareholders.

Principal Investment Risks

An investment in the Fund entails risks. The Fund could lose money, or its performance could trail that of other investment alternatives. The following provides additional information about the Fund's principal risks. It is important that investors closely review and understand these risks before making an investment in the Fund. Just as in the Fund's summary section, the principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

- **Associated Risks of Alcohol Companies.** Companies in the alcohol industry are very competitive and subject to a number of risks. Demographic and product trends, changing consumer preferences, nutritional and health-related concerns, competitive pricing, marketing campaigns, environmental factors, adverse changes in general economic conditions, government regulation, consumer boycotts, risks of product tampering, product liability claims, and the availability and expense of liability insurance can affect the demand for, and success of, such companies' products in the marketplace. Such companies also face risks associated with changing market prices as a result of, among other things, changes in government support and trading policies and agricultural conditions influencing the growth and harvest seasons. Alcohol companies may be adversely affected by the adoption of proposed legislation and/or by litigation.
- **Associated Risks of Betting and Gaming Companies.** The betting and gaming industry is characterized by an increasingly high degree of competition among a large number of participants including from participants performing illegal activities or unregulated companies. Expansion of betting and gaming in other jurisdictions (both regulated and unregulated) could increase competition with existing betting and gaming companies, which could have an adverse impact on their financial condition, operations and cash flows. In a broader sense, betting and gaming companies face competition from all manner of leisure and entertainment activities, including shopping, athletic events, television and movies, concerts and travel. In addition, established jurisdictions could award additional licenses or permit the expansion or relocation of existing betting and gaming companies. These companies also may be subject to increasing regulatory constraints, particularly with respect to cybersecurity and privacy. In addition to the costs of complying with such constraints, the unintended disclosure of confidential information, whether because of an error or a cybersecurity event, could adversely affect the reputation, profitability and value of these companies.
- **Associated Risks of Pharmaceutical Drug Companies.** The pharmaceutical industry can be significantly affected by government approval of products and services, government regulation and reimbursement rates, pricing pressure (including price discounting), limited product lines, patent expirations, and intense competition. The costs associated with developing new drugs can be significant, and the results are unpredictable. Newly developed drugs may be susceptible to product obsolescence due to intense competition from new products and less costly generic products. Pharmaceutical companies, may be heavily dependent on clinical trials with uncertain outcomes and decisions made by the governments and regulatory authorities. Pharmaceutical companies are heavily dependent on patent protection. The expiration of patents may adversely affect the profitability of the companies. Pharmaceutical companies are also subject to extensive litigation based on product liability and other similar claims. A pharmaceutical company's valuation can often be based largely on the potential or actual performance of a limited number of products and can accordingly be greatly affected if one of its products proves, among other things, unsafe, ineffective or unprofitable. Pharmaceutical companies are subject to regulation by, and the restrictions of, the FDA, the EPA, state and local governments, and foreign regulatory authorities.
- **Cannabis Company Risk.**
 - *United States Regulatory Risks of the Cannabis Industry.* The possession and use of marijuana, even for medical purposes, is illegal under federal and certain states' laws, which may negatively impact the value of the Fund's investments. Use of marijuana is regulated by both the federal government and state governments, and state and federal laws regarding marijuana often conflict. Marijuana is a Schedule I controlled substance under the CSA and is illegal under federal law. Currently, over half of the states plus the District of Columbia have laws and/or regulations that recognize, in one form or another, legitimate medical uses for cannabis and consumer use of cannabis in connection with medical treatment or for non-medical purposes. Even in those states in which the use of marijuana for medical or non-medical purposes has been legalized, its sale and use remains a violation of federal law. Federal law criminalizing the use of marijuana pre-empts state laws that legalizes its use for medicinal and recreational purposes. The priority for enforcement of federal marijuana laws may vary by presidential administrations. It is not yet known whether the current administration will push back against states where marijuana use and possession is legal and step up the enforcement of federal marijuana laws and the prosecution of nonviolent federal drug crimes. Such actions could produce a chilling effect on the industry's growth and discourage banks from expanding their services to cannabis companies. This conflict between the regulation of marijuana under federal and state law creates volatility and risk for all cannabis companies. In

particular, the stepped up enforcement of marijuana laws by the federal government would adversely affect the value of the Fund's U.S. investments. Cannabis companies may never be able to legally produce and sell products in the United States or other national or local jurisdictions.

As noted above, marijuana is a Schedule I controlled substance in the United States under the CSA. The DEA classifies controlled substances into five schedules: Schedule I, II, III, IV or V substances. Schedule I substances by definition have a high potential for abuse, have no currently "accepted medical use" in the United States, lack accepted safety for use under medical supervision, and may not be prescribed, marketed or sold in the United States. Pharmaceutical products approved by the FDA for use in the United States may be listed as Schedule II, III, IV or V, with Schedule II substances considered to present the highest potential for abuse or dependence and Schedule V substances the lowest relative risk among such substances.

Few drug products containing natural cannabis or naturally-derived cannabis extracts have been approved by the FDA for use in the United States or obtained DEA registrations for commercial production. Drug products containing cannabis or cannabis extracts that receive the required government approvals for use in commercial production may be subject to significant government regulation regarding manufacture, importation, exportation, domestic distribution, storage, sale, and legitimate use. In addition, the scheduling process may take one or more years, thereby delaying the launch of the drug product in the United States.

Cannabis companies in the U.S. that engage in medical or pharmaceutical research or the production and distribution of controlled substances such as marijuana must be registered with the DEA to perform such activities and have the security, control, recordkeeping, reporting and inventory mechanisms required by the DEA to prevent drug loss and diversion. Failure to obtain the necessary registrations or comply with necessary regulatory requirements may significantly impair the ability of certain companies in which the Fund invests to pursue medical marijuana research or to otherwise cultivate, possess or distribute marijuana.

Additionally, federal tax law prohibits a taxpayer from claiming a deduction or credit for any amount paid or incurred during the tax year in carrying on any trade or business if that trade or business (or the activities that comprise that trade or business) consists of trafficking in controlled substances (e.g., marijuana) where that trafficking is prohibited by either federal law or the state law for the state in which the trade or business is conducted. Consequently, companies engaged in the cannabis business may pay higher amounts of taxes than non-cannabis companies, which could result in less income to the Fund and, in turn, less for the Fund to distribute to shareholders.

- *Non-U.S. Regulatory Risks of the Cannabis Industry.* Laws and regulations related to the possession, use (medical or recreational), sale, transport and cultivation of marijuana vary throughout the world, and the Fund will only invest in Canadian cannabis companies if such companies are operating legally in the relevant jurisdiction. Even if a company's operations are permitted under current law, they may not be permitted in the future, in which case such company may not be in a position to carry on its operations in its current locations. Additionally, controlled substance legislation differs between countries and legislation in certain countries may restrict or limit the ability of certain companies in which the Fund invests to sell their products.
- *Operational Risks of the Cannabis Industry.* Companies involved in the cannabis industry face intense competition, may have limited access to the services of banks, and are heavily dependent on receiving necessary permits and authorizations to engage in medical cannabis research or to otherwise cultivate, possess or distribute cannabis. Because the cultivation, possession, and distribution of cannabis is in all circumstances illegal under United States federal law, federally regulated banking institutions may be unwilling to make financial services available to growers and sellers of cannabis.

Companies participating in the cannabis industry may face litigation, formal or informal complaints, enforcement actions, and inquiries by various federal, state, or local governmental authorities. Litigation, complaints, and enforcement actions could consume considerable amounts of financial and other corporate resources, which could have a negative impact on sales, revenue, profitability, and growth prospects. Similarly, certain companies may not be able to obtain or maintain the necessary licenses, permits, authorizations, or accreditations, or may only be able to do so at great cost, to engage in medical marijuana research or to otherwise cultivate, possess or distribute marijuana. Failure to comply with or to obtain the necessary licenses, permits, authorizations, or accreditations could result in restrictions on a company's ability to legally engage in medical marijuana research or to otherwise cultivate, possess or distribute marijuana, which could have a negative impact on the value of the Fund's investments.

- **Concentration Risk.** Because the Fund's assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries. To the extent the Fund concentrates in the securities of issuers in a particular industry, the Fund may face more risks than if it were diversified more broadly over numerous industries. Such industry-based risks, any of which may adversely affect the Fund may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand in a particular industry; competition for resources, adverse labor relations, political or world events; obsolescence of technologies; and increased competition or new

product introductions that may affect the profitability or viability of companies in an industry. In addition, at times, an industry may be out of favor and underperform other industries or the market as a whole. As of December 1, 2022, the Index was concentrated in the Casinos & Gaming Industry and Pharmaceuticals, Biotechnology & Life Sciences Industry Group.

- *Casinos & Gaming Industry.* The Casinos & Gaming Industry includes owners and operators of casinos and gaming facilities, and companies providing lottery and betting services. The Casinos & Gaming Industry is highly competitive and companies operating in the Casinos & Gaming Industry rely heavily on consumer spending and the availability of disposable income for success. In addition, the Casinos & Gaming Industry may be negatively affected by changes in economic conditions, consumer tastes and discretionary income levels, technological developments, limited financial resources, competition from competing entertainment options, and competition for key personnel. Casinos are closely tied to the travel and tourism industry and are particularly sensitive to economic shutdowns and mitigation strategies, such as the COVID-19 pandemic. In addition, Casinos & Gaming Industry companies are highly regulated, and state and federal legislative or regulatory changes and licensing issues (as well as the laws of other countries) can significantly impact their ability to operate in certain jurisdictions. The Casinos & Gaming Industry is a sub-industry of the Hotels, Restaurants & Leisure Industry within the Consumer Discretionary Sector.
- *Pharmaceuticals, Biotechnology & Life Sciences Industry Group.* The Pharmaceuticals, Biotechnology & Life Sciences Industry Group includes companies operating in the Biotechnology, Pharmaceuticals and Life Sciences Tools & Services Industries. Companies in the Biotechnology Industry are primarily engaged in the research, development, manufacturing and/or marketing of products based on genetic analysis and genetic engineering, including companies specializing in protein-based therapeutics to treat human diseases. Companies in the Pharmaceuticals Industry include companies engaged in the research, development or production of pharmaceuticals, including veterinary drugs. Companies in the Life Sciences Tools & Services Industry include companies enabling the drug discovery, development and production continuum by providing analytical tools, instruments, consumables & supplies, clinical trial services and contract research services and include firms primarily servicing the Pharmaceuticals and Biotechnology Industries. Companies operating within the Pharmaceuticals, Biotechnology & Life Sciences Industry Group may be significantly affected by, among other things, government approval of products and services, government regulation and reimbursement rates, product liability claims, patent expirations and protection, and intense competition. The prices of securities of such companies also may be affected by effects from world events and market, economic and political risks of countries where the companies are located or do business. Legislative or regulatory changes and increased government supervision also may affect companies in the Pharmaceuticals, Biotechnology & Life Sciences Industry Group.
- **Depository Receipt Risk.** The Fund may hold the securities of non-U.S. companies in the form of depository receipts, including ADRs and GDRs. ADRs are negotiable certificates issued by a U.S. financial institution that represent a specified number of shares in a foreign stock and trade on a U.S. national securities exchange, such as the New York Stock Exchange (the “NYSE”). Sponsored ADRs are issued with the support of the issuer of the foreign stock underlying the ADRs and carry all of the rights of common shares, including voting rights. GDRs are similar to ADRs, but may be issued in bearer form and are typically offered for sale globally and held by a foreign branch of an international bank. The underlying issuers of certain depository receipts, particularly unsponsored or unregistered depository receipts, are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities. Issuers of unsponsored depository receipts are not contractually obligated to disclose material information in the U.S. and, therefore, such information may not correlate to the market value of the unsponsored depository receipt. The Underlying Shares in the Fund’s portfolio are usually denominated or quoted in currencies other than the U.S. Dollar. As a result, changes in foreign currency exchange rates may affect the value of the Fund’s portfolio. In addition, because the Underlying Shares trade on foreign exchanges at times when the U.S. markets are not open for trading, the value of the Underlying Shares may change materially at times when the U.S. markets are not open for trading, regardless of whether there is an active U.S. market for Shares.
- **Emerging Markets Risk.** Emerging markets are subject to greater market volatility, lower trading volume, political and economic instability, uncertainty regarding the existence of trading markets and more governmental limitations on foreign investment than more developed markets. In addition, securities in emerging markets may be subject to greater price fluctuations than securities in more developed markets. Differences in regulatory, accounting, auditing, and financial reporting and recordkeeping standards could impede the Sub-Adviser’s ability to evaluate local companies and impact the Fund’s performance. There also may be limitations on the rights and remedies available to investors in emerging market companies compared to those associated with U.S. companies. In addition, brokerage and other transaction costs on foreign securities exchanges are often higher than in the U.S. and there is generally less government supervision and regulation of exchanges, brokers and issuers in foreign countries.
- **Equity Investing Risk.** An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of outperformance and underperformance in comparison to the general securities markets. In addition,

securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Recent unprecedented turbulence in financial markets, reduced liquidity in credit and fixed income markets, or rising interest rates may negatively affect many issuers worldwide, which may have an adverse effect on the Fund.

- **ETF Risks.** The Fund is an ETF and, as a result of this structure, is exposed directly or indirectly to the following risks:
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. Shares may trade at a material discount to NAV and possibly face delisting if either: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
 - *Costs of Buying or Selling Shares Risk.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors also will incur the cost of the difference between the price at which an investor is willing to buy Shares (the “bid” price) and the price at which an investor is willing to sell Shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid/ask spread.” The bid/ask spread varies over time for Shares based on trading volume and market liquidity and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Shares, including bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
 - *Shares May Trade at Prices Other Than NAV Risk.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. The market price of Shares during the trading day, like the price of any exchange-traded security, includes a “bid/ask” spread charged by the exchange specialist, market makers or other participants that trade Shares. In times of severe market disruption, the bid/ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. The Adviser believes that, under normal market conditions, large market price discounts or premiums to NAV will not be sustained because of arbitrage opportunities. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund’s primary listing exchange is open, the Fund is likely to experience premiums or discounts greater than those of domestic ETFs.
 - *Trading Risk.* Although Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500[®] Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Foreign Markets Risk.** Investments in ADRs and GDRs and ETFs that provide exposure to non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, the value of non-U.S. securities may be subject to risk of decline due to foreign currency fluctuations or to political or economic instability. Investments in ADRs and GDRs also may be subject to withholding or other taxes and may be indirectly subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

- *Canada Risk.* Canada is a significant exporter of natural resources, such as oil, natural gas and agricultural products. As a result, the Canadian economy is susceptible to adverse changes in certain commodities markets. It is also heavily dependent on trading with key partners, including the United States, Mexico, and China. Any reduction in trading with these key partners may adversely affect the Canadian economy. Canada's dependency on the economy of the United States, in particular, makes Canada's economy vulnerable to political and regulatory changes affecting the United States economy.
- **Index Provider Risk.** There is no assurance that the Index Provider, or any agents that act on its behalf, will compile the Index accurately, or that the Index will be determined, constructed, reconstituted, rebalanced, composed, calculated or disseminated accurately. The Sub-Adviser relies upon the Index Provider and its agents to compile, determine, construct, reconstitute, rebalance, compose, calculate (or arrange for an agent to calculate), and disseminate the Index accurately. Any losses or costs associated with errors made by the Index Provider or its agents generally will be borne by the Fund and its shareholders. To correct any such error, the Index Provider or its agents may carry out an unscheduled rebalance of the Index or other modification of Index constituents or weightings. When the Fund in turn rebalances its portfolio, any transaction costs and market exposure arising from such portfolio rebalancing will be borne by the Fund and its shareholders. Unscheduled rebalances also expose the Fund to additional tracking error risk. Errors in respect of the quality, accuracy, and completeness of the data used to compile the Index may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, particularly where the Index is less commonly used as a benchmark by funds or advisors. For example, during a period where the Index contains incorrect constituents, the Fund tracking the Index would have market exposure to such constituents and would be underexposed to the Index's other constituents. Such errors may negatively impact the Fund and its shareholders. The Index Provider and its agents rely on various sources of information to assess the criteria of issuers included in the Index, including information that may be based on assumptions and estimates. Neither the Fund nor the Sub-Adviser can offer assurances that the Index's calculation methodology or sources of information will provide an accurate assessment of included issuers.
- **Market Capitalization Risk.**
 - *Large-Capitalization Investing Risk.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and, therefore, subject to slower growth during times of economic expansion. Large-capitalization companies also may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
 - *Mid-Capitalization Investing Risk.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole. Some mid-capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies.
 - *Small-Capitalization Investing Risk.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small-capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.
- **Market Risk.** The trading prices of securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund's NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. U.S. and international markets have experienced significant periods of volatility in recent years due to a number of economic, political and global macro factors, including public health issues, growth concerns in the U.S. and overseas, uncertainties regarding interest rates, trade tensions and the threat of tariffs imposed by the U.S. and other countries. In addition, local, regional or global events such as war, including Russia's invasion of Ukraine, acts of terrorism, spread of infectious diseases or other public health issues, recessions, rising inflation, or other events could have a significant negative impact on the performance of the Fund and its investments. These developments as well as other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, which could have an adverse effect on the Fund.

The COVID-19 pandemic has significantly impacted economies and markets around the world, including the United States. The pandemic has resulted in a wide range of social and economic disruptions, including closed borders, voluntary or compelled

quarantines of large populations, stressed healthcare systems, reduced or prohibited domestic or international travel, supply chain disruptions, and so-called “stay-at-home” orders throughout much of the United States and many other countries. Financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Some sectors of the economy and individual issuers have experienced particularly large losses. Such disruptions may continue for an extended period of time or reoccur in the future to a similar or greater extent. Liquidity for many instruments has been greatly reduced for periods of time. In response to these disruptions, the U.S. government and the Federal Reserve have taken extraordinary actions to support the domestic economy and financial markets. It is unknown how long circumstances related to the COVID-19 pandemic will persist, whether they will reoccur in the future, whether efforts to support the economy and financial markets will be successful, and what additional implications may follow from the pandemic. The impact of these events and other epidemics or pandemics in the future could adversely affect Fund performance.

- **Non-Diversification Risk.** Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a lesser number of issuers than if it was a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a lesser number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund’s performance.
- **Passive Investment Risk.** The Fund is not actively managed and its Sub-Adviser would not sell an investment designed to provide exposure to the Index or a constituent holding of the Index due to current or projected underperformance of a security industry or sector unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a rebalancing of the Index as addressed in the Index methodology.
- **Sector Risk.** The Fund’s investing approach may result in an emphasis on certain sectors or sub-sectors of the market at any given time. To the extent the Fund invests more heavily in one sector or sub-sector of the market, it thereby presents a more concentrated risk and its performance will be especially sensitive to developments that significantly affect those sectors or sub-sectors. In addition, the value of Shares may change at different rates compared to the value of shares of a fund with investments in a more diversified mix of sectors and industries. An individual sector or sub-sector of the market may have above-average performance during particular periods, but may also move up and down more than the broader market. The several industries that constitute a sector may all react in the same way to economic, political or regulatory events. The Fund’s performance could also be affected if the sectors or sub-sectors do not perform as expected. Alternatively, the lack of exposure to one or more sectors or sub-sectors may adversely affect performance.
 - *Consumer Discretionary Sector Risk.* Consumer discretionary companies are companies that provide non-essential goods and services, such as retailers, media companies and consumer services. These companies manufacture products and provide discretionary services directly to the consumer, and the success of these companies is tied closely to the performance of the overall domestic and international economy, interest rates, competition and consumer confidence. Success depends heavily on disposable household income and consumer spending. Changes in demographics and consumer tastes can also affect the demand for, and success of, consumer discretionary products in the marketplace.
 - *Consumer Staples Sector Risk.* Companies in the consumer staples sector, including those in the food and beverage industries, may be affected by general economic conditions, commodity production and pricing, consumer confidence and spending, consumer preferences, interest rates, product cycles, marketing campaigns, competition, and government regulations.
 - *Health Care Sector Risk.* Companies in the health care sector are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines, an increased emphasis on the delivery of healthcare through outpatient services, loss or impairment of intellectual property rights and litigation regarding product or service liability.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund’s daily portfolio holdings is available at <https://badinvestmentco.com>. A complete description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s Statement of Additional Information (the “SAI”).

MANAGEMENT

Investment Adviser

Thematic Investments, LLC (dba “The BAD Investment Company”), a Delaware limited liability company located at 6201 College Boulevard, 7th Floor, Overland Park, Kansas 66211, serves as the investment adviser for the Fund. The Adviser oversees the day-to-

day operations of the Fund, subject to the general supervision and oversight of the Board of Trustees (the “Board”) of Listed Funds Trust (the “Trust”). The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, distribution and all other services necessary for the Fund to operate. The Adviser is an SEC-registered investment adviser. As of December 31, 2022, the assets managed by the Adviser are only those of the Fund.

The Adviser continuously reviews, supervises, and administers the Fund’s investment program. In particular, the Adviser provides investment and operational oversight of the Sub-Adviser. The Board supervises the Adviser and establishes policies that the Adviser must follow in its day-to-day management activities. For the services it provides to the Fund, the Adviser is entitled to a unified management fee, which is calculated daily and paid monthly, at an annual rate of 0.75% of the Fund’s average daily net assets.

Pursuant to an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser (the “Advisory Agreement”), the Adviser has agreed to pay all expenses of the Fund except the fee payable to the Adviser under the Advisory Agreement, interest charges on any borrowings, dividends, and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution (12b-1) fees and expenses (if any). The Adviser, in turn, compensates the Sub-Adviser from the management fee it receives.

The basis for the Board’s approval of the Advisory Agreement is available in the Fund’s Semi-Annual Report to Shareholders dated May 31, 2022.

Investment Sub-Adviser

Toroso Investments, LLC, located at 898 North Broadway, Suite 2, Massapequa, New York, 11758, is responsible for the day-to-day management of the Fund. The Sub-Adviser is an SEC-registered investment adviser. As of December 31, 2022, the Sub-Adviser had approximately \$5.57 billion under management.

The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the Fund, subject to the supervision of the Adviser and the Board. For its services, the Sub-Adviser is entitled to a fee by the Adviser, which fee is calculated daily and paid monthly, at an annual rate of the Fund’s average daily net assets as follows:

Sub-Advisory Fee Schedule (bps)	
Breakpoint Fee*	
First \$500MM	3.5 bps
Next \$500MM	3.25 bps
Over \$1B	3.0 bps
*Minimum fee of \$30,000 per annum	

The basis for the Board’s approval of the Sub-Advisory Agreement is available in the Fund’s Semi-Annual Report to Shareholders dated May 31, 2022.

Portfolio Managers

Charles Ragauss, CFA[®] and Qiao Duan, CFA[®] are jointly responsible for day-to-day management of the Fund’s portfolio. Mr. Ragauss serves as Portfolio Manager and Head of Trading for the Sub-Adviser, having joined the firm in September 2020. Mr. Ragauss has also served as Chief Operating Officer and Director of Portfolio Management at Investment Advisory, L.P., doing business as Exponential ETFs, since April 2016. Mr. Ragauss served as a portfolio manager for the Exponential ETFs from their inception in May 2019 until he began managing the ETFs on behalf of the Sub-Adviser in May 2021. Previously, Mr. Ragauss was Assistant Vice President at Huntington National Bank (“Huntington”), where he was Product Manager for the Huntington Funds and Huntington Strategy Shares ETFs, a combined fund complex of almost \$4 billion in assets under management. At Huntington, he led ETF development bringing to market some of the first actively managed ETFs. Mr. Ragauss joined Huntington in 2010. Mr. Ragauss attended Grand Valley State University where he received his Bachelor of Business Administration in Finance and International Business, as well as a minor in French. He is a member of both the National and West Michigan CFA societies and holds the CFA designation.

Ms. Duan serves as Portfolio Manager at the Sub-Adviser focusing on strategy implementation and trade execution, having joined the firm in October 2020. From February 2017 to October 2020, she was an executive Portfolio Manager at Exponential ETFs, where she managed research and analysis relating to all Exponential ETF strategies. Ms. Duan previously served as a portfolio manager for the Exponential ETFs from their inception in May 2019 until October 2020. Ms. Duan received a Master of Science in Quantitative Finance and Risk Management from the University of Michigan in 2016 and a Bachelor of Science in Mathematics and Applied Mathematics from Xiamen University in 2014. She holds the CFA designation.

The Fund’s SAI provides additional information about each Portfolio Manager’s compensation structure, other accounts managed by the Portfolio Manager, and the Portfolio Manager’s ownership of Shares.

Other Service Providers

Forside Fund Services, LLC (the “Distributor”) serves as the principal underwriter and distributor of the Fund’s Shares. The Distributor’s principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor will not distribute shares in less than whole Creation Units, and it does not maintain a secondary market in the Shares. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934, as amended, and a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund and is not affiliated with the Adviser, Sub-Adviser, or any of their respective affiliates.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the administrator, transfer agent and index receipt agent for the Fund.

U.S. Bank National Association, located at 1555 North Rivercenter Drive, Suite 302, Milwaukee, Wisconsin 53212, serves as the custodian for the Fund.

Morgan, Lewis & Bockius LLP, located at 1111 Pennsylvania Avenue, N.W., Washington, D.C. 20004, serves as legal counsel to the Trust.

Cohen & Company, Ltd., located at 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115, serves as the Fund’s independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Fund’s transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (the “DTC”) or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC’s participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or “street name” through your brokerage account.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly from the Fund, are an essential part of the ETF process and help keep Share trading prices in line with NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and lead to the realization of capital gains. The Fund’s fair valuation of its holdings consistent with the 1940 Act and Rule 2a-5 thereunder and its ability to impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades help to minimize the potential adverse consequences of frequent purchases and redemptions.

Determination of Net Asset Value

The Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange (the "NYSE"), generally 4:00 p.m. Eastern time, each day the NYSE is open for business. The NAV is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. In particular, the Fund generally values equity securities at their readily available market quotations. If such information is not available for a security held by the Fund or is determined to be unreliable, the security will be valued by the Adviser at fair value pursuant to procedures established by the Adviser and approved by the Board (as described below).

Fair Value Pricing

The Adviser has been designated by the Board as the valuation designee for the Fund pursuant to Rule 2a-5 under the 1940 Act. In its capacity as valuation designee, the Adviser has adopted procedures and methodologies to fair value Fund securities whose market prices are not "readily available" or are deemed to be unreliable. For example, such circumstances may arise when: (i) a security has been de-listed or has had its trading halted or suspended; (ii) a security's primary pricing source is unable or unwilling to provide a price; (iii) a security's primary trading market is closed during regular market hours; or (iv) a security's value is materially affected by events occurring after the close of the security's primary trading market. Generally, when fair valuing an investment held by the Fund, the Adviser will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the security, general and/or specific market conditions and the specific facts giving rise to the need to fair value the security. Fair value determinations are made in good faith and in accordance with the fair value methodologies established by the Adviser. Due to the subjective and variable nature of determining the fair value of a security or other investment, there can be no assurance that the Adviser's determined fair value will match or closely correlate to any market quotation that subsequently becomes available or the price quoted or published by other sources. In addition, the Fund may not be able to obtain the fair value assigned to an investment if the Fund were to sell such investment at or near the time its fair value is determined.

Investments by Registered Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in section 12(d)(1), subject to certain terms and conditions, including that such investment companies enter into an agreement with the Fund.

Delivery of Shareholder Documents – Householding

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The Fund intends to pay out dividends, if any, and distribute any net realized capital gains to its shareholders at least annually. The Fund will declare and pay capital gain distributions in cash, if any. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax adviser about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws. This summary does not apply to Shares held in an IRA or other tax-qualified plans, which are generally not subject to current tax. Transactions relating to Shares held in such accounts may, however, be taxable at some time in the future. This summary is based on current tax laws, which may change.

The Fund intends to elect and to qualify each year for treatment as a regulated investment company (a "RIC") within the meaning of Subchapter M of the Code. If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, the Fund's failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (APs only).

Taxes on Distributions

The Fund intends to distribute, at least annually, substantially all of its net investment income and net capital gains. For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income. Taxes on distributions of capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned his or her Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains, which for non-corporate shareholders are subject to tax at reduced rates of up to 20% (lower rates apply to individuals in lower tax brackets). Distributions of short-term capital gain will generally be taxable as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided certain holding period and other requirements are met. Qualified dividend income generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. For such dividends to be taxed as qualified dividend income to a non-corporate shareholder, the Fund must satisfy certain holding period requirements with respect to the underlying stock and the non-corporate shareholder must satisfy holding period requirements with respect to his or her ownership of the Fund's Shares. Holding periods may be suspended for these purposes for stock that is hedged.

Shortly after the close of each calendar year, you will be informed of the amount and character of any distributions received from the Fund.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares' NAV when you purchased your Shares).

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. Gains from the sale or other disposition of your Shares from non-U.S. shareholders generally are not subject to U.S. taxation, unless you are a nonresident alien individual who is physically present in the U.S. for 183 days or more per year. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Different tax consequences may result if you are a foreign shareholder engaged in a trade or business within the United States or if a tax treaty applies.

The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that the shareholder is not subject to such withholding.

Taxes When Shares Are Sold on the Exchange

Provided that a shareholder holds Shares as capital assets, any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares of the Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the disposition of Shares. The ability to deduct capital losses may be limited.

The cost basis of Shares of the Fund acquired by purchase will generally be based on the amount paid for the Shares and then may be subsequently adjusted for other applicable transactions as required by the Code. The difference between the selling price and the cost basis of Shares generally determines the amount of the capital gain or loss realized on the sale or exchange of Shares. Contact the

broker through whom you purchased your Shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP's aggregate basis in the securities delivered, plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP's basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The Internal Revenue Service (the "IRS") may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for an AP who does not mark-to-market its holdings) or on the basis that there has been no significant change in economic position. APs exchanging securities should consult their own tax adviser with respect to whether the wash sales rule applies and when a loss might be deductible.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Net Investment Income Tax

U.S. individuals with income exceeding specified thresholds are subject to a 3.8% tax on all or a portion of their "net investment income," which includes interest, dividends, and certain capital gains (generally including capital gains distributions and capital gains realized on the sale of Shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Foreign Investments by the Fund

The Fund invests in foreign securities. Interest and other income received by the Fund with respect to foreign securities may give rise to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. If as of the close of a taxable year more than 50% of the value of the Fund's assets consists of certain foreign stock or securities, the Fund will be eligible to elect to "pass through" to investors the amount of foreign income and similar taxes (including withholding taxes) paid by the Fund during that taxable year. This means that investors would be considered to have received as additional income their respective shares of such foreign taxes, but may be entitled to either a corresponding tax deduction in calculating taxable income, or, subject to certain limitations, a credit in calculating federal income tax. If the Fund does not so elect, it will be entitled to claim a deduction for certain foreign taxes incurred by the Fund. The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

Foreign tax credits, if any, received by the Fund as a result of an investment in another RIC (including an ETF which is taxable as a RIC) will not be passed through to you unless the Fund qualifies as a "qualified fund-of-funds" under the Code. If the Fund is a "qualified fund-of-funds" it will be eligible to file an election with the IRS that will enable the Fund to pass along these foreign tax credits to its shareholders. The Fund will be treated as a "qualified fund-of-funds" under the Code if at least 50% of the value of the Fund's total assets (at the close of each quarter of the Fund's taxable year) is represented by interests in other RICs.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares. Consult your personal tax adviser about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAI.

DISTRIBUTION PLAN

The Board has adopted a Distribution and Service Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

Information regarding how often Shares traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV per share is available on the Fund's website at <https://badinvestmentco.com>.

ADDITIONAL NOTICES

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of the Fund's Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of the Fund's Shares in connection with the administration, marketing, or trading of the Fund's Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, Sub-Adviser and Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

FINANCIAL HIGHLIGHTS

The following financial highlights table shows the financial performance information for the Fund's five most recent fiscal years (or the life of the Fund, if shorter). Certain information reflects financial results for a single share of the Fund. The total returns in the table represent the rate that you would have earned or lost on an investment in the Fund (assuming you reinvested all distributions). This information has been audited by Cohen & Company, Ltd., the independent registered public accounting firm of the Fund, whose report, along with the Fund's financial statements, is included in the Fund's [Annual Report](#), which is available upon request.
